Taking bladder cancer patients' voice forward

Time Session

14:30 **Welcome from WBCPC President**

Shining a light on bladder cancer patient & carer experiences

Launch of Global Bladder Cancer Patient Survey 2022 results

14:40 The first-ever survey of its kind to shine a light on bladder cancer patient experiences around the world concluded in 2022. Collecting data on patients' and carers' experiences was fundamental as it will allow us to identify what is important to them and drive patient-centred care improvements.

Discussion of the survey findings

15:00 Following the presentation of the findings, we will hear further perspectives on the insights emerging from the survey findings and what it means in practice.

Taking bladder cancer patients' voice forward through action

15:10 Multi-disciplinary moderated panel discussion will share their views, and concrete actions on taking patients' voice shared with us in the survey forward. The discussion will focus on key areas of the bladder cancer patient care continuum and ways to address these together.

Rising to the challenge - Examples from the patient community

Community support and advocacy projects leading change

16:00 WBCPC member organisations are the cornerstone of bladder cancer patient communities in their countries. We will showcase initiatives from our coalition that drive improvements and better support for people affected by bladder cancer.

16:30 **Summary and conclusion**
